

## What Sets This Siding Apart

While stone seems like a natural choice for homes of a certain size and style, you might be surprised at how effortlessly they can also be integrated into any decor or vision. For example, try using this siding as a backsplash in the kitchen. It can work outside or in just about any room in your house: kitchen, bathroom, living room or bedroom. You could replace a dated, painted accent wall with this natural stone siding. You could also play up the earthy character of your fireplace by surrounding it with stone. So many things are possible with this product and these key features not only set it apart from any other products of its kind, but also from the traditional way of installing natural stone:

- **Ease of installation** — Anyone can install this, you *do not* need a mason.
- **Affordability** — It's cheaper than purchasing materials separately and paying someone else to install it.
- **Simplicity** — All you need to install are screws and washers (included with the stone), making installation a breeze.
- **Multiple styles** — We have 8 unique styles to choose from
- **Long lasting** — Made from natural stone, this will last for years and years to come, without fading like manufactured stone.

Finally, a durable, affordable natural stone option that's installed without mortar, lath or masons in a fraction of the time it takes to install traditional veneer. The addition of stone brings warmth and elegance wherever it's installed. From smaller jobs like backsplashes or fireplace makeovers to whole house and commercial applications, our siding will save you a tremendous amount of time, money and stress!

## About Us

Real Stone Veneers of TN was established in Whitwell, TN in 2009. Since that time, we have grown from a small supplier of local stone to a large-scale wholesaler that provides stone to dealers all over the country! We also quarry and cut stone from many regions of the U.S. However, our work in the stone industry did not stop there. We longed to make stone accessible to anyone for any project - and from that, Real Stone Siding & Block was established in 2019 out of our Dunlap facility. Our quality products set us apart from the competition, and our customer service and love for natural stone shows in our dedication to providing a unique, cost-effective stone product with which to beautify your home or landscape.
